## CHALLENGES IN USER ONBOARDING TO WEB3.0:

- Users unfamiliar with blockchain technology
- Complex and intimidating onboarding
- Lack of seamless integration between traditional web2.0 games and emerging web3.0 platforms.

## CENTRALIZED OWNERSHIP AND LIMITED PLAYER FREEDOM:

- Players lack true ownership of in-game assets and content.
- Gaming studios hold excessive control over virtual economies.
- Limited player-driven decision-making and customization

## WEB3 ADOPTION:

01

- User-friendly interfaces and familiarity
- Bridging web2.0 and web3.0
- Simplifying user onboarding

## EMPOWERED OWNERSHIP AND FREEDOM:

02

- Leveraging web3.0's decentralized cloud 3.0 infrastructure provide by internet computer
- Implementing player-driven economies
- Providing tools for players to influence game development decisions

## ETHICAL FREE-TO-PLAY MODEL:

03

- Incorporating the successful web2.0 business model of Ethical Free-to-Play
- Ensuring a balanced gameplay experience without pay-to-win mechanics
- Offering cosmetic upgrades and optional in-game purchases that enhance player enjoyment
